25X1

- 25X1 2. Comment. The names of the supply officers are mostly known from previous reports.
- 25X1 3. Comment. Deliveries amounted to 83 carloads in November 1952, 116 carloads in December 1952, 112 carloads in January 1953 and 91 carloads in February 1953. They hold about the same level as that in September and October 1952. It is of interest that, despite of considerable difficulties on the supply sector in East Germany, the delivery quota for military units did not decrease. supply reparation deliveries to the U.S.S.R. have in the meantime been given delay. Requests by the Armed Forces, however, had to be met 100 percent.
- 25X1 4. Comment. Large quantities of Soviet grain were delivered to several large mills in Wurzen, under the grain shuttle program. Except for the 108 outgoing carloads in January 1953, the rate of outgoing shipments held the level of the preceding months.
